EDUCATION

KL University

Bachelor of Technology in Artificial Intelligence and Data Science; CGPA - 9.27

Vijayawada, Andhra Pradesh

August 2021 – May 2025

EXPERIENCE

Data Analyst – AI/LLM

Innodata Inc.

December 2025 – Present

Noida, Uttar Pradesh, India (Remote)

- Trained and evaluated Large Language Models (LLMs) by creating, annotating, and validating high-quality datasets for NLP tasks such as classification, summarization, and instruction-following
- Performed prompt engineering and response optimization to improve model accuracy, contextual reasoning, and consistency across AI workflows
- Conducted detailed error analysis and quality audits to identify model gaps, reduce hallucinations, and enhance overall AI reliability while designing and refining prompts to improve model accuracy and response consistency
- Collaborated with AI research and engineering teams to align data strategies with model training objectives while ensuring responsible AI and data quality standards

Backend Developer

Segura Invendors Private Ltd

February 2025 – November 2025

Vijayawada, Andhra Pradesh

- Built and maintained scalable RESTful APIs using Node.js and Express.js, enhancing backend performance
- Integrated secure authentication and role-based access control, ensuring platform-wide data protection
- Optimized MongoDB/MySQL queries and schemas, cutting response times by 40% on key services
- Contributed to Agile development cycles, performing code reviews, debugging, and ensuring on-time delivery

PROJECTS

AI-Powered Online Compiler | React, Node.js, Docker, MongoDB, Firebase

April 2025 – Present

- Developed a full-stack online compiler supporting 16+ languages and Docker-based secure execution
- Integrated a custom Generative AI assistant for code generation, debugging, and logic enhancement
- Implemented user authentication, persistent code storage, and link-based sharing using JWT, Firebase
- Deployed responsive UI with React.js and Tailwind CSS on Vercel with real-time collaboration

Customer Feedback Sentiment Analysis | Python, Scikit-learn, Pandas, AWS SageMaker

Nov 2022 – July 2023

- Engineered a sentiment analysis pipeline to classify 50K+ customer feedback entries using machine learning
- Achieved 85% accuracy in sentiment detection (positive, negative, neutral) through NLP model tuning
- Deployed the model on AWS SageMaker and visualized insights with Power BI

LLM-Based Product Recommendation System | Python, Streamlit, Flask, PostgreSQL

June 2023 – Sep 2023

- Built a recommendation engine that combined behavioral data and language models for personalized suggestions
- Deployed with Flask and Streamlit on AWS EC2, utilizing PostgreSQL for persistent storage
- Increased user engagement by 30% and conversions by 20% using real-time feedback and interaction logging

CERTIFICATES AND ACHIEVEMENTS

- Google TensorFlow Developer, Salesforce AI Associate, Oracle Cloud Associate (2023–24)
- IBM Data Analysis using Python – Data wrangling, visualization, and statistical analysis
- Founded 2 technical clubs at the university; Hosted 50+ events and 10+ Hackathons at National level
- Solved 1300+ DSA problems across LeetCode, GFG, CodeChef, and HackerRank platforms

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, Java, C/C++/C#, JavaScript, HTML/CSS

Databases & Big Data Tools: MySQL, PostgreSQL, MongoDB, Hive, Drill, PySpark

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau, Scikit-learn

Frameworks & Concepts: Flask, React, RESTful APIs, Agile, Functional Programming, Modular Architecture

Tools/Technologies: Git, Jira, VS Code, PyCharm, Eclipse, Salesforce, GCP, AWS EC2/SageMaker, Azure
